

Skills

- **Frontend:** React, HTML, CSS, JavaScript, Flutter
 - **Backend:** Node, PHP, C#, .net
- **Database:** SQL
 - **Cloud:** AWS (Lambda, S3, EC2)

Projects

- PORTFOLIO WEBSITE | React | Personal Project | [Link](#)

Mar 2025

 - Designed and developed a football game-inspired portfolio website using **React** for an engaging and interactive user experience.
 - Created a custom "Squad Management" section to showcase projects like managing football players, allowing drag-and-drop swap functionality between project cards.
 - Implemented **state management** for dynamic squad updates and user interactions.
 - Built a fully **responsive** UI optimized for desktops, tablets, and mobile devices.
 - Styled using modern CSS techniques to reflect a clean football game interface with animated transitions.
 - Enhanced performance and user interaction with component **reusability**.
- SCANCART | Flutter | Personal Project | [Link](#)

Sept 2024

 - Built a **Flutter** app to reduce shopping mall queues and workforce by up to **40%**.
 - Enabled **barcode** scanning to **add, edit, and delete** products in a virtual cart.
 - Integrated **Firebase Cloud Storage** for fast, synchronized product storage.
 - Used **BLoC** state management for smooth UI and efficient state handling.
 - Added a shop **promotion** feature to display sponsored stores on the homepage.
- CAFÉ MANAGEMENT SYSTEM | .NET | Personal Project | [Link](#)

Jan 2023

 - Developed a **.NET** desktop app for cafe management with **Admin, Employee, and Customer** roles.
 - Enabled Admins to **add, update, delete** products and view sales **analytics** in a real-time **dashboard**.
 - Customers can order products and receive a **QR code** via email for quick pick up.
 - Employees can scan QR codes to verify and deliver orders efficiently.
 - Reduced cafe workload and **improved** order processing speed by up to **30%**.
 - Used **SQL** database for secure and reliable **backend** data management.

Work Experience

- MOBILE APP ENGINEER INTERN | Centrric | Kerala, IN

April 2022 - May 2022

 - Worked as a **Flutter** Mobile App Engineer Intern for an **Android** based parenting app prototype.
 - Developed two responsive **UI screens** as part of the app's core user flow.
 - Contributed to **bug fixing** and feature **enhancements** in the chat section.
 - Integrated new questions and connected them to **Firebase** for real-time data handling.
- FREELANCE WEB SCRAPING | Extracting Business Leads | Remote

Dec 2024 - Jan 2025

 - **Scraped** and cleaned **25,000+** business listings from Google Maps using Puppeteer in **Node JS**, improving data accuracy by **90%** by handling duplicates and missing fields.
 - **Automated** data extraction, reducing manual effort by 80% and delivering structured Excel report.

Education

- BACHELOR OF VOCATION IN SOFTWARE DEVELOPMENT & SYSTEM ADMINISTRATION

Mahatma Gandhi University – Kerala, IN

June 2021 - March 2024
