SKILLS

- ❖ Flutter
- ❖ BLoC
- ❖ Firebase
- ❖ API Integration
- ❖ HTML, CSS, Javascript, React
- ❖ SQL
- ❖ .NET

EDUCATION

- ❖ Bvoc Software Development & System Administration | Mahatma Gandhi University (2021 - 2024)

EXPERIENCE

- ❖ **Mobile App Engineer Internship | Centrric**
(April - May 2022)
 - Collaborated with a **team** to develop a parenting app using Flutter
 - Focused on the chat section, fixing bugs and integrating question features with Firebase.

ACADEMIC PROJECTS

- ❖ **ScanCart | [GitHub](#)**
 - Leveraged **BLoC** for efficient state management
 - Integrated barcode scanning to fetch product details and add to virtual cart.
 - Reduced shop workforce by automating the checkout process.
 - Utilized **Firebase** for real-time data sync
- ❖ **Quiz App | [Github](#)**
 - Optimized app performance using **Provider** for seamless state transitions.
 - Integrated **Firebase** to store and fetch quiz data dynamically.
 - Added animated countdown timers for quiz timeouts to enhance user experience
- ❖ **Covid Vaccine Alert App | [Github](#)**
 - App to notify users of available **COVID-19** vaccine slots.
 - Integrated **CoWIN API** to fetch real-time hospital and vaccine availability details.
 - Implemented notifications to alert users when vaccine slots become available in their area.
 - Allowed users to search for slots by location, age group, and vaccine type
- ❖ **Wallpaper App | [GitHub](#)**
 - Integrated **Pexels API** to fetch a vast collection of high-resolution images.
 - Enabled users to search for wallpapers by category or keyword.
 - Provided functionality to download and set wallpapers directly from the app.
